

Brazoria Telephone Selects NISC's iVUE® Enterprise System to Streamline Their Operational Processes

Mandan, N.D., March 1, 2017 — Brazoria Telephone (BTEL), headquartered in Brazoria, Texas, has selected National Information Solutions Cooperative (NISC) as its primary software solutions provider to support its operational and customer service efforts.

BTEL is an independent telecommunications company serving communities southwest of Houston. BTEL and its cable brand, Coastal Link, have been providing broadband, cable, wireless and telephone services to the community since 1946. BTEL has selected NISC's fully-integrated iVUE® Enterprise System to support its accounting, engineering and customer care functions.

"We partnered with Centerra Corp and undertook a vigorous search to consolidate our current billing system platforms," said Charlie Greenberg, BTEL President. "The results of that search led us to NISC, which we feel their system best fits our business and will allow us to upgrade the customer experience. We look forward to the implementation of their dynamic systems and are excited to use their software as a foundation to support our future growth."

"I am so very pleased to welcome BTEL to the NISC family," said Jasper Schneider, NISC Vice President of Member Engagement. "Their commitment to their customers and their desire to innovate to continue to bring the best services to those very customers complements the development and vision of NISC. BTEL was looking for a technology partner. We look forward to working with them and proving to them each day that they made the best decision for their telecom and for their customers."

About NISC

National Information Solutions Cooperative (NISC) is an information technology organization that develops, implements and supports software and hardware solutions for our Members/Customers. We deliver advanced solutions, services and support to more than 800 independent telephone companies, electric cooperatives and other public power entities.
