

## For Immediate Release

September 25, 2017

### APMAX ACS Service Adds Support for Algo Paging/Alert Device

**Mitchell, SD** – - Innovative Systems has completed interoperability testing and has added the Algo 8180 SiP wall mount voice paging device to the APMAX Automated Configuration Service. The Algo device joins the Snom PA1 to give service providers a wider variety of SiP paging options that they can manage in their hosted PBX offerings using one of the over 800 APMAX systems deployed throughout North America..

The speaker is powered with PoE and is designed so that no additional amplifier is needed. Devised for loud ringing, the 8180 is rated up to eight times louder than a telephone speaker. This device supports HD voice and can deliver voice paging and emergency announcements. An integrated microphone in the speaker enables talkback.

The 8180 comes with pre-loaded audio files in the unit's internal memory that include ring sounds. Administrators can also upload custom audio files into the device. One 8180 can receive a SiP call and then broadcast a single multicast stream to as many additional Algo speakers as needed.

### Many Business Applications for this Device

Any of your business clients who have large open work areas would find this SiP device useful. Facilities with a large footprint and multiple offices such as schools or governmental facilities are also a good fit for this device.

### About Innovative Systems

For many years, Innovative Systems has been a leading provider of solutions for the North American Tier 3 market with nearly 1200 systems deployed. eLation™, our OSS solution, includes integrated billing, financials, automated provisioning, ACS, and Staking and Mapping. The InnoStream™ server is our one-platform approach to IPTV solutions such as Middleware, VOD, Cloud DVR, Restart TV, HLS Packaging, Conditional Access, and the new IS-5112W set-top box. The APMAX™ hardware platform provides enhanced voice and hosted business solutions. The Innovative Systems Print Division specializes in full color printing of variable data statements and invoices for industries including telecom, utilities, and sanitation.
